The Portfolio Presents 1964-65 Ambassador College Freshmen!

At last the interviews for the class of 1968 have been completed! Each year *The PORTFOLIO* prints an individual interview as an introduction of each member of the incoming freshman class. Now that we have three colleges, this service is of even more importance. For although for the most part most of us on campus know each other already, the students on the other campuses at best know only a few of the upperclassmen, and that through the pages of *The ENVOY*.

This year we have chosen to present very informal pictures of each freshman along with a little about his life and why he came to Ambassador College. This year's class was again the "largest in the history of Ambassador College." Most of the interviewees of this class date back to around 1946-47, when each of this year's 147 new students began the journey toward Ambassador College.

One has studied Industrial Wood Technology. Others have already received degrees or worked in the local five and dime. The varied interests and wide range of studies in which these students have involved themselves makes for lively and sparkling conversations!

Sports stand out as a major interest

Registration Day began the most exciting phase of your life!

for most of the men, while the women favor cooking, sewing (both of which things the men are thankful for!), and teaching. Others have had unique opportunities such as being Assistant State Veterinarian for the state of Oregon, class valedictorian, or chess(nut) champ.

Whatever the case is, whoever you are, you will learn something new about somebody in this special issue. If nothing else, the freshmen will learn what they *really* look like! (*You really do!*)

You'll notice right away that none of the photos in this issue present very flattering views of the subjects. The original idea was to get the job done quickly and in a different way. But we have later seen the "wisdom" of this decision. With such quality (?) in the writing, *something* had to be done to preserve the humility of the first year class! Casual photographs were the ready-made answer!

Let's turn to page two and get to know each other better!

BOBBY BOYCE was born in Quitaque, Texas, but Oklahoma claims him as occupant. After attending junior college in South Plains for two years and working in construction for one year, he applied for college. He says he likes basketball, so he can expect to satisfy his heart's desire at the new gymnasium!

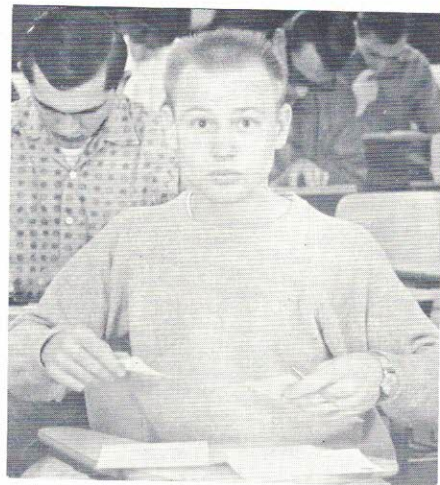

JOE SMITH comes to us from Ellsworth, Michigan. "I am the eighth child of ten," he says. Welcome to a really BIG family, Joe! He likes sports, especially hunting and hiking. "If you have some time and a hill to be won, give me a call and we will have some fun!" he challenges.
