Academic Center Pre-Cast Elements Hoisted Into Place

Workmen watched intently as another 23,400 pound element of pre-cast concrete was hoisted into place by the titanic crane. Then they relaxed as it was carefully secured to the massive supporting webs.

By now (the time this will reach the reader) all of these huge elements for the Fine Arts Building will have been placed to their positions. These elements are pre-cast by a patented method in which the whole form, being constructed of wood covered with fiber-

Artist's concept of new men's dormitory.

NEW MEN'S DORMITORY TO BE STARTED SOON

After the greatest financial break through in God's Work in this age, the long awaited and much needed Men's Dormitory can now be built.

This beautiful new facility will far exceed any other comparable

facility on the face of the earth. The Dormitory will be composed of three units. The East Unit (Unit A) will be built on the present site of Murphy House. This unit will house sixty-four students and all of the mechanical and electrical equipment for the entire dormitory. The roof of this unit will be utilized as a spacious sun deck.

The West Unit (Unit B) will be built on the present site of 350 and the old Assembly Hall. This unit will house eighty students. The West Unit's foundation will be one story higher than that of the East Unit, giving the

whole complex a split level effect. (Note the above artists concept.)

Both of the Units will have three stories, and be connected by a third unit. This third unit will be the Lounge and storage areas for both the East and West Units.

All of the area where the Bauer's and Aust's are presently staying, and the area where Grove Terrace was will become beautifully landscaped gardens.

The New Dormitory was designed by our architects Daniel, Mann, John-

Ambassador Clubs Get Under Way For Fall Semester

Last night Ambassador Clubs got into full swing for the fall, 1967 semester.

These clubs, and the women's clubs as well offer tremendous opportunities available at no other college or university. The opportunity to meet and fellowship with others of like mind in an atmosphere of beauty and culture. The opportunity to develop your personality and give of yourself to others. And the opportunity to learn and gain insight from other people's experiences and ideas. ALL PRICELESS!

And all under the guidance of a director put there by God; a man who is

Have you ever wondered how Bob McGuinness took second place last year in the 440-yard dash without training? As the third place runner in that event, I surely did!

Well, the other day I found out. The old Aussie did train! He worked out every morning from 7:44 to 7:44 and 53 seconds. You see Bob lived in 360 C all last year, which is 440 yards, give or take a few feet, from the wooden door leading into the serving area at the Student Center.

Have you ever wondered why Bob only came in second? Why didn't he take first in this race at which he was so experienced? Why did it take him three seconds longer to get around the track than to Breakfast?

The answer rings clear. It is quite obvious, and there is no denying it. Lack of Motivation! In short, no food!!

"ROOM FOR ONE MORE..."

by George L. Johnson

We've heard time and time again that God's Work grows thirty percent each year. But somehow we still don't seem to think that there is, or will be any place for us in God's work. We seem to think that *all* of the positions are filled.

But all of the positions are *not* filled. There is room for one more!!!

Seven years ago when I first attended Church in Chicago, there were only thirty-one churches in the United States. And there were only 5,400 people attending these thirty-one churches. This total was for the entire United States, not just one church district!

Seven years ago *The PLAIN TRUTH* magazine had a circulation of only 190,000 copies per month. *The PLAIN TRUTH* didn't have a color cover yet, let alone full color inside!

Seven years ago there was only one Ambassador College with the second about ready to open its doors (Fall 1960). The largest Freshman Class yet — ninety-two students — had been accepted that year. Seven years ago Ambassador College did not have the big press building — *The PLAIN TRUTH* was being printed by Pacific Press. We did not have the new Physical Education Building, or the beautiful new Student Center either.

Seven years ago there was only one site in the United States where the Feast of Tabernacles was being held. Members had to come from all over the United States to attend the Feast in Big Sandy, Texas.

This was God's work seven years ago. Why have I gone back to only 1960 to show you the amount of growth that has taken place in God's Work? I use this date because the growth that has taken place since then, I have seen with my own eyes. I have seen these changes. I know that they have taken place.

Now let's look at the changes that have taken place in those seven short years.

Today the church attendance in the Big Sandy District totals almost as much as the whole United States did in 1960. This district alone has 5,200 in attendance. And the total for the entire United States is 42,000. Church attendance has multiplied almost eight times in the past seven years!

Today there are 1,030,000 copies of *The PLAIN TRUTH* magazine printed *in full color* on our own giant four-color, web-fed press.

Today there are three Ambassador Colleges — Pasadena, Bricket Wood, and Big Sandy. A total of about four hundred Freshmen were accepted at all three colleges this year — quite a contrast to the number in 1960.

Today there are five sites in the United States alone where the Feast of Tabernacles will be held — with the groundwork already being laid for the sixth, which should be ready by 1969.

But this is only the beginning! Mr. Herbert Armstrong has said many times that this Work — this Work of the Living Jesus Christ — will have to grow as much in the *next* four and one-half years as it has in the past thirty!

Think of it! Where will the manpower to staff the foreign offices, to pastor the churches, to visit the members, to print the literature, to read and answer the mail, and to work as backup men and assistants here at Headquarters come from?

The men and women to fill these needed positions will come mainly from the three Ambassador Colleges. There *is* a place in God's growing work for you. There is a place for all of us. There is room for a whole lot more than just one. We need to be training ourselves to fill those positions.

There is a place for *you* IF you are willing to *work* for it!

PIZZAZZ FUN & JOY

by Bill Jacobs

THE RUSSIANS ARE COMING, THE RUSSIANS ARE COMING! Actually the Russians are already here. And actually they are not Russians, they're Ukrainians. This year three of them registered for classes. Perhaps you have met them without even knowing it.

Our first and biggest Russian is Victor Kubik, affectionately dubbed "the bear" by some of his friends for obvious reasons. Vic came to us last year from Minnesota where his family attended church for several years before Vic came to college. Everyone knows Vic had the opportunity to travel through the Iron Curtain countries with Dr. Hoeh this summer. But what most of us do not know is that Vic had a real problem—he attracted Russian women everywhere he went! (This interesting sidelight is brought into the open by Mr. Plache in Family Relations.)

Next we come across another second year veteran, Tony Wasilkoff. Tony forged his way into the world during the coldest May of the nineteen year time cycle, nineteen years ago up in Canada, where he studied the Bible Correspondence Course and listened to *The World Tomorrow* for five years before coming to Ambassador College. Tony is one of "the men in white coats"—a member of the college paint crew.

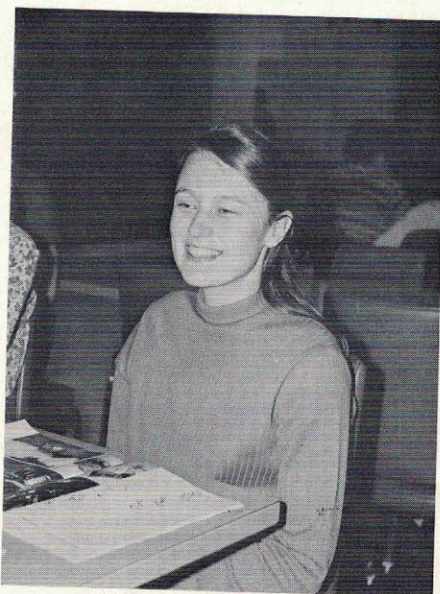

Tony's roommate, Oleg (more frequently called "Al") hails from the Ukraine via Germany, New York, and Miami respectively. On the way he picked up English and two years of electronics training at a junior college. Al and Tony constantly baffle monitor Blackwell as they endeavor to communicate in "tongues." Mike thinks they are trying to "edify" themselves—which is correct. Tony, speaking Ukrainian, and Al, speaking Russian, are exchanging languages—edifying each other. We asked Al the difference between a Russian and a Ukrainian and discovered

Brigitte Groth to Work in Geneva Office

With no assurance of being accepted, Brigitte Groth quit her job and flew here from Zurich, Switzerland, last January. After talking to Mr. Apartian, she was, to her great joy, allowed to move into Mayfair.

All this took courage, and Brigitte has been abundantly blessed for it!

Brigitte was here a full eight months—the spring and summer semesters. Last Friday night (September 8), Mr. Apartian told her that she was being transferred to the Geneva office. Hurriedly packing on Saturday night, Brigitte excitedly and anxiously headed for the airport at 10:30 p.m. She will reach Switzerland by Wednesday (September 13) where she will work under Mr. Wilkins in our Geneva office.

Brigitte — Geneva bound.

An Open Letter to the Faculty

I would like to speak for the student body if I may, in saying thank-you for causing the enforcement of quiet hours from eight to ten o'clock in the evenings.

Every student that I personally have talked with is extremely happy with the situation. We get more accomplished

both areas are republics within the Soviet Union, each with a language, each language somewhat similar to the other. Al seems to fit right into the Ukrainian picture except for one thing—he would much rather have a beer than a shot of vodka.

Wait, we have one more Russian. But Tina, our transfer from England is too pretty to be classified with the big three. You can either get to know her first hand or wait on us—we're saving her for another time.

than ever before possible. Consequently we get more wrapped-up in our studies, learn more, enjoy our studies more, worry less about grades, and as a result enjoy our lives much more.

I would consider this past week one of the highlight weeks of my college career. I know that because of the continued enforcement of this rule every week will be just as exciting and profitable.

This is why I for one, and I am sure the entire student body is very thankful for the eight to ten quiet hours that exist here at Ambassador College.

A woman's idea of keeping a secret is refusing to tell who told it to her.

Why can't life's problems hit us when we're eighteen and know all the answers?

BOOK REVIEW

THE MURDERERS
AMONG US

by Lon Lacey

Even before Germany's surrender in 1945 German industrialists were planning for a fourth Reich! These German industrialists — Rochling, Krupp, Messerschmidt, the Goering Werke of Linz — initiated transfer of various assets into other countries, among them: looted property and large funds.

Simon Wiesenthal tells of this and many other intriguing accounts in the book, *The Murderers Among Us*. Mr. Wiesenthal, a Jew, was an inmate of several Nazi concentration camps. His life was miraculously spared a dozen times! His children and all of his relatives, except his wife, were exterminated in the gas chambers. His own loss and the horrors he had witnessed made Mr. Wiesenthal vow to spend the rest of his life bringing Nazi criminals to justice. He has brought over 1,000 notorious Nazis to trial, including Adolf Eichmann.

Read how he did this and more of the clandestine German underground plan to rule the world in *The Murderers Among Us!*

Courtship is the process of seeking a girl's hand until she has you under her thumb.

Ambassador Clubs

(Continued from page 1)

concerned about each club member and eager to guide him towards *overcoming* his drawbacks and growing and maturing as a speaker and as a man.

Let's not forget our part either. Each man (and all this applies to the women too), should do his part and more to make his club a profitable and exciting part of his college career.

Plan ahead for club during the previous week. To make yours a good club — and a club is no more than the composite of its members — it is up to *you* to make those suggestions during the business portion of the meeting, and to make those vocal exercises lively and stimulating. Contribute *your* part for an engrossing table topics session and drink in of the ideas of others.

Really work on those speeches. Make them dynamic, meaningful. And they will help you as well as your fellow club members grow. And remember, God has provided these priceless opportunities for a purpose. Let's use them. See you in club.

The secret of financial success is to spend what you have left after saving, instead of saving what you have left after spending.

Building Progress

(Continued from page 1)

glass, is vibrated to shake out all the air bubbles.

There are to be thirty-eight of the elements for the Fine Arts Building and the same number for the Science Hall of the new Loma D. Armstrong Academic Center. But it will be another three weeks or a month before these elements will be put in their places on the Science Hall. Each element, twenty feet high and ten feet wide, is as smooth and beautiful as fine marble.

These buildings are really going to be excellent — all of the workmen will agree to that. One workman remarked to me, "I am going to bring my son out here and show him what a *real* college looks like!"

New Men's Dorm

(Continued from page 1)

son, and Mendenhall, and will be built by the William J. Moran Co.

Murphy House to Go!

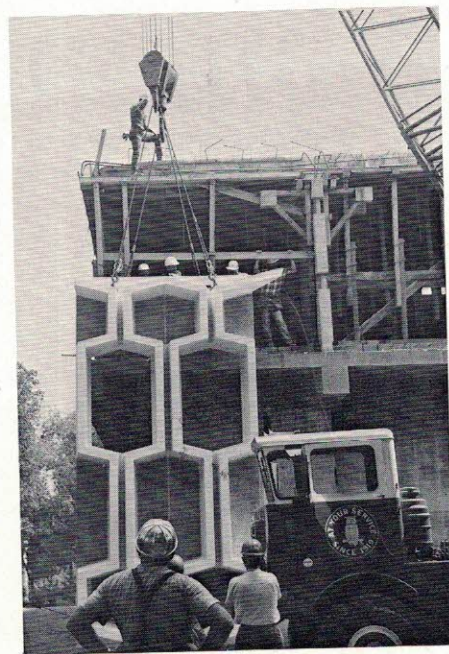

Sunday, September 17, thirty-five girls moved out of Murphy House. Good ol' Murphy has been a good and faithful abode for co-eds for exactly 8 years (can't find anything significant in that — unless it's the number of destruction). Murphy House was a part of the Merritt estate that the college purchased September 18, 1959.

Murphy has not only served as a place to hang our hats but housed our Women's Club meetings for years before we had the Student Center.

You probably think we're glad to see Murphy go. But not so, we are only glad because it means progress, and living space for more students.

Ask any co-ed who has lived here, we all loved it. Yes, we had our problems, having only one shower for a whole floor, ants marching in a regimented line across your desk, having four prayer closets, leaky pipes and rattling windows

The demolition of Murphy House, 350, and the Assembly Hall is scheduled to begin this Wednesday — so goodbye Murphy House. You have served the college well.

Six ton element hoisted into place.
