WEEKLY

February 6, 1967

"World Tomorrow" Reaches Jerusalem

"... the law shall go forth of Zion, and the word of the Eternal from Jerusalem" (Micah 4:2). For the first time in nearly nineteen centuries, this Scripture is soon to be fulfilled. Mr. Charles Hunting has assured Headquarters that the 200,000-watt Jordanian *Hashemite Radio* will soon broadcast *The World Tomorrow* weekly from the Jordanian side of JERUSALEM!

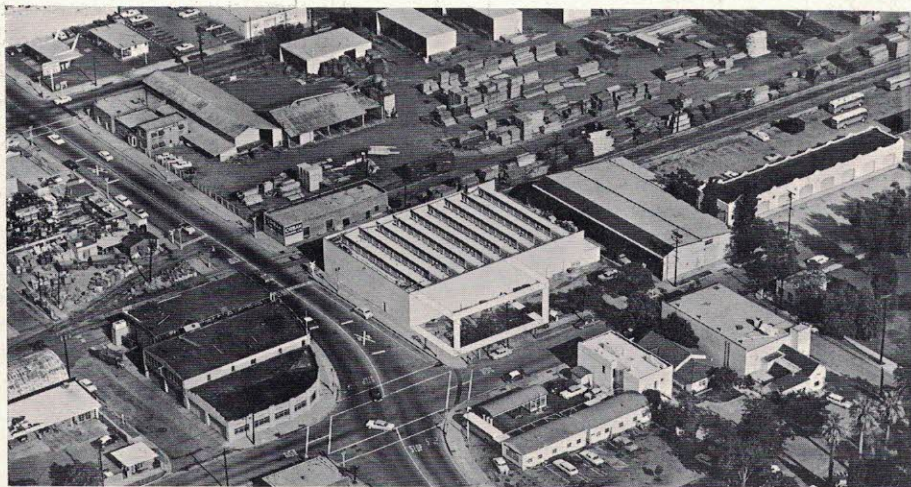

Mr. Hunting made final arrangements yesterday (Sunday), and word has not yet reached the PORTFOLIO of any final details, but the door has already opened, and it is sure God's Work will walk through one of the most important doors yet opened in this age.

Mr. Schreiber to Head Transportation Dept.

In just two weeks, Transportation Department will be moving into spanking new temporary offices in ye Olde Gun Shoppe on Green Street. Along with this move will come a new department organization to keep this fast-growing department streamlined.

In the years ahead, the number of ministers and assistants will *quadruple*. With that growth comes a quadrupling in the number of necessary lease cars.

With this growth in mind, Mr. Leonard Schreiber is being called in
(Continued on page 3)

The proposed new west wing of the Press (white lines) will unify pre-press operations.

Ambassador Press Expands

The printing division of Ambassador College is scheduled to *double* in size and machinery over the next year-and-a-half, according to Mr. Herbert W. Armstrong's announcement last Sabbath. A second new *web-fed* press and a second *color separator* are the two major purchases in a many-faceted press expansion. The web-fed press should take fourteen to eighteen months to deliver, since it has to be made to specifications in England and then shipped.

In composing, Mr. Merk will have the benefit of nine durable Intertype and Linotype machines to add to the three now there.

In pre-press, Mr. Schoon will be able to expand into the new block shown above. He will have a new color separator (the original one is now at work 24 hours a day), new plate-making equipment, and a new photo processor.

The pre-press section will no longer have to be split between two offices a block-and-a-half apart.

This long-range expansion will streamline another section of God's Work in preparation for the monumental work ahead of us.

Faculty-Juniors Win

This Wednesday night, the Faculty and Juniors again clash for the *lead* in Ambassador's exciting invitational tournament. Both teams are fresh from comeback victories Saturday night.

The Freshmen were as hot as their

PIZZAZZ

Have you been drugged into a stupor by "Nopizzazztol" (Thanx, Mr. Clark)? Ask yourself these questions to see if you have been slipped a deadening dose of this wretched drug! Do you seldom see any humor on campus? Do you have trouble remembering the gist of the daily broadcast? Do you scowl at breakfast prep humor? Are you hard pressed for speech topics? Does life seem routine to you?

If you answer "Yes" to any of these, you have been stupified by "Nopizzazztol!" How do you fight it? Simple. Take an ANECDOTE. Look for the little anecdotes which sparkle throughout every day at Ambassador. Wake up, be aware, enjoy. Life drips and bubbles with pizzazz—select little tidbits of gusto, wisdom, wit, banter, savor, zest, and interest. LOOK FOR IT. Reach out and take it.

Pizzazz is not the whole picture. But everybody that was anybody had it. We need Pizzazz! So, that is what this column will be written about, for and of — PIZZAZZ.

This Week at Ambassador:

Faculty vs. Juniors Wed. 7:30
Assembly, Mr. Aparian ... Thurs. 4:00
— No games Saturday night —
Field Trip Wed., Feb. 15

Editorial

Today's News TODAY!

by Gary Alexander

Surprise!!

The PORTFOLIO is now a *weekly* newspaper, consisting of the *latest* word in campus growth, sports news, student announcements, and campus pizzazz.

Many of you students haven't realized that past PORTFOLIOS have taken *two weeks* to assemble. If we ever wanted to print news fresher than two weeks old, we had to interrupt its production at press and splice in our newsbreak. Even then, the newsiest story could only be *one week old*. The time we reported on the field trip the next day took *one month of planning* with the press, and 24 straight hours of work for us and the pressmen.

All these steps were necessary to paste up galleys, take pictures, proof and crop them, have our proofs approved and so forth.

But then the SPORTFOLIO forced us to come out *the next day*, and we began to realize that all these steps might not be necessary if we make the PORTFOLIO look more like the *SportFOLIO*.

An idea was born—a marriage between PORTFOLIO and SPORTFOLIO.

With this weekly *newspaper*, operated on newspaper principles (not magazine principles, as we had been doing), we can offer you, the student body:

1) NEWSIER NEWS. If news breaks on *Sunday*, we can have it in your hands Monday at forum. Class meetings, special assemblies, or rehearsals can all be announced in your student paper for double emphasis.

2) A TIMELY CHRONICLE OF ACTIVITIES. We can give you all the news that's fit to print about student life, Ambassador Clubs, language clubs, forums and assemblies, dorm life, and college expansion. Use this for ready reference of last week's activities or for nostalgia in future years. This also provides the ministers in the field with a much quicker knowledge of what's happening on campus.

3) MORE OPPORTUNITIES TO WRITE. We are under much greater pressure coming out weekly, but that gives YOU more chance to share the load. If I say, "There's a new press coming in tomorrow. Can you get the facts and write it up?" or "Could you please write up the Sophomore girls' wild antics on breakfast prep, and have it in my box tomorrow?" will you be *responsible* to meet that deadline? Will you show the *initiative* to turn in short and sweet tidbits of day-to-day life at Ambassador?

Whether we *abandon* this ambitious project, *stagnate* in article quality, or go on to *expand* to bigger and better articles, with larger tabloid newspaper style—it's all up to us! If we get enough people responsible enough to turn in a *column* or *cartoon* each week, we can begin to look like a newspaper *should*!

We on the staff hope you enjoy this new format. It's a challenge to produce it each week, but a joy to see the service and unity that a newsy weekly paper can give to the entire student body.

The Abominable Gardener?

A fifteen-inch footprint was found last week in the same 1967 dichondra strata with a size *three* shoe. Super sleuthing by our own Perkins revealed this "bipedus missin linkus" to be none other than Ambassador's king of foot-
dom, Bob Evans, and his diminutive

sidekick, Carol Landes. He wears size 15, she wears size 3.

Did You Know?

The new book storage racks in the Dining Hall are made from Thailand teakwood, one of the rarest and finest woods in the world.

Forum Notes

Forum — "The most inspiring forum this year" — "Boy! That was like lifting a five hundred-pound weight from off my back." These were comments that followed Mr. Garner Ted Armstrong's forum on *balance in activities* on Monday, January 30. His encouragement to those who thought they were "clubbed" to death plus the inspiring picture of World Tomorrow activities brought tears to some eyes and thankfulness from us all for such a timely forum.

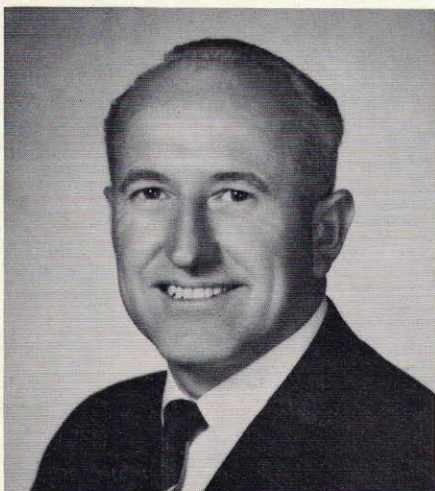

Assembly — Mr. John Goddard, famed explorer and world traveller, presented a two-hour color film and narrative of his recent explorations to New Zealand, Australia, and New Guinea. Come April 6, he will make another welcome trip to our gymnasium for films and comment on an exciting quest to Mt. Ararat.

Transportation

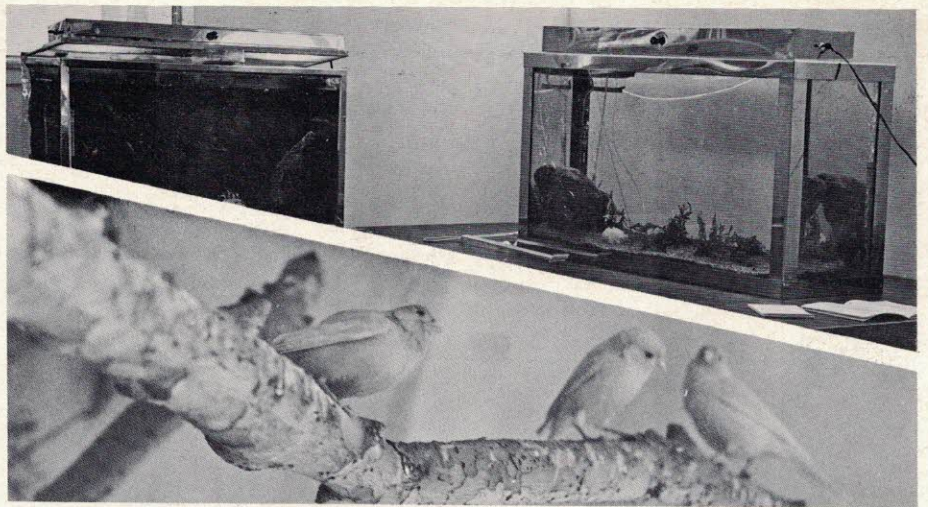

(Continued from page 1)

from the field to supervise the Transportation Department, under Mr. Portune. Under Mr. Schreiber, Mr. Bill Evans will supervise the burgeoning Lease Fleet Operations, a *full-time* job.

Mr. Schreiber has been employed for many years in the automotive industry in Mechanics, maintenance and supervision before becoming full-time Elder in God's Church. Now all that training will be put to use to streamline *Ambassador's* burgeoning transportation needs.

Mr. Schreiber, new Transportation supervisor.

Fish and Fowl Department

Aviary-Aquarium Add Animal Antics

by Bill Jacobs

Remember the fantastic aviary we all saw at the Los Angeles Zoo? Well, the next time you plan a trip to an aviary forget the L.A. Zoo and come over to our own aviary on Olcott Place.

That's right! Now Ambassadors can observe bobwhites, canaries, quail, ring-necked doves, and zebra finches (to name a few) in their new dwelling happily pecking, scratching, and twittering.

Although the aviary as George Johnson explains in jest, "is for the birds," it also houses a pond containing three bluegill perch. Most of the birds, beginning to nest now, will have little ones hatching shortly.

The aviary, a private project, resulted from the extra effort of predominately full-time gardeners such as Messrs. James Robertson, Walt Salmon, and Samuel Dunlap. The birds came from members of the gardening crew and from several generous church members also.

Take a stroll by Olcott Place soon, and stop, look, and listen at our own *Ambassador Aviary*.

Ambassador Aquarium

by Jerry Gentry

Sea Anemones! Hermit Crabs! Living Coral! A Porkfish! and one Mono!

That's what *you* can see stashed away in one corner of the Layout Room in the Editorial Department. It all began with the Archer Fish, and now the story adds many other strange and wonderful creatures from the ocean depths.

The latest project? To set up a *nat-*

ural environment for the muddy-looking, protoplasmic-like blob called an ANGLER FISH and photograph him in action!

The Photography Staff hopes to photograph the Angler fishing for his meal, and other marvels of the deep to illustrate future articles in the Evolution series in *The PLAIN TRUTH*.

Come down to the Editorial Department and see tomorrow's picture today.

Circular File

Bits and Pieces

by George Johnson

After making a gross goof in Club, yours truly found that there was more than one field he could be sent to. I was quickly reminded that Nebuchadnezzar spent seven years in the field! Now that's something to think about!!

Introductory Geology???

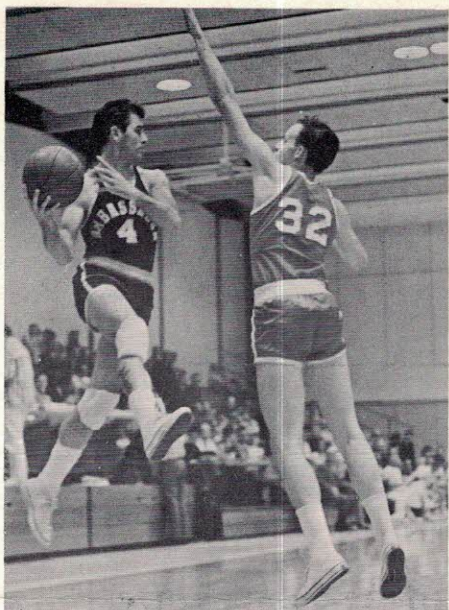

According to Howard Baker, Introductory Geology started out on a solid foundation, but it ended up on the rocks!

Howard will be able to get the straight statistics on stratigraphy because Mr. Macdonald is now speaking BOULDER AND BOULDER!!!?

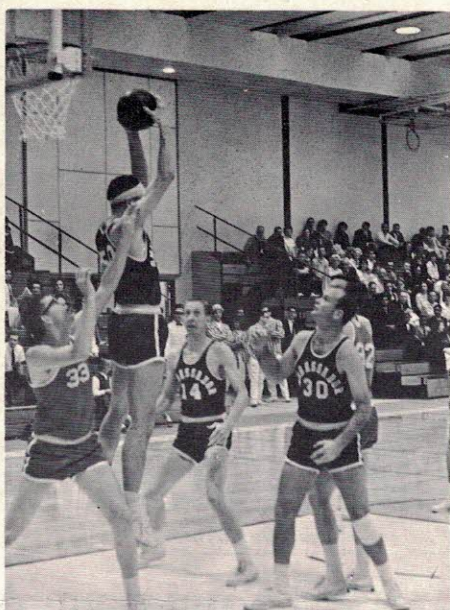

International Relations!!

What is a Piece Conference? It's a meeting where nations get together to decide which nation they want a *PIECE OF NEXT!!*

If you can read the Polish language, call Jerry Gentry at 227 — quickly!

The league's leading assister (left), rebounder (right) and scorer (below) in action.

Faculty Foil Frosh

(Continued from page 1)

red uniforms for the first half, rushing to a 8-2 lead, then 20-14, after which the cold Faculty didn't score for *five straight minutes!* 28-14 — Freshmen by double!! The half ended 34-25 in favor of the red-hot Freshmen.

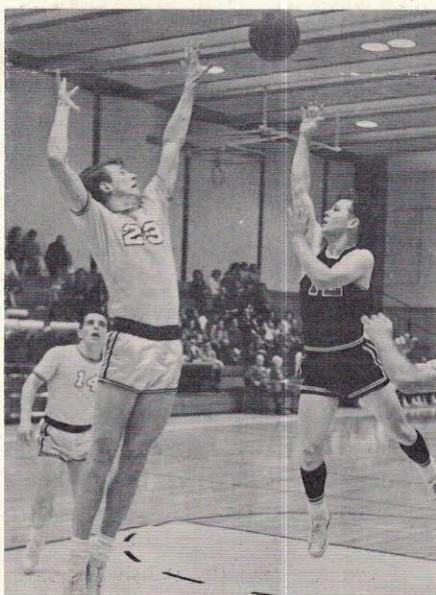

The second half was as different as night is from day. The Faculty scored 52 points to the Freshmen's 24! The Freshmen only seldom hit the *rim*, much less a field goal. With 9:53 left Mr. Petty artfully put the Faculty ahead to stay. They won by 19.

Did the red-hot Freshmen have a cold shower at the half or was it Faculty stamina? Whatever the reason, the mys-

tical Faculty offer the Juniors quite a challenge for first place Wednesday.

Come see the action!

Bob Boyce at his best — before sprain.

Juniors Squeak By Seniors

The decimated Seniors almost scored the upset of the season last Saturday night, as they led the Juniors for thirty minutes, before falling 86-84 in the last bid for victory.

The Seniors scored first — again — but didn't need to stall this time! They were the masters of the court, jumping ahead 26-18 at the ten-minute mark, and holding out against Carley's hot hand for a 44-41 half-time edge.

Balanced shooting and hot hustle dominated the second-half comeback of the Juniors, as they finally sported a nine point lead over the confident Seniors, 72-63.

Beautiful shooting by Nelson and Bob plus a workhorse under the backboards (Joel Gerstmann) began to give the Seniors their exciting comeback, but TRAGEDY STRUCK at 5:20!

Bob Boyce sprained his right ankle, and joined the growing crowd in *limbus crutchus*, the rest home for sprained ankles.

Despite Nelson's patented "Gateway Arch" shot and his successful swishing, the Seniors could only come within two points at the buzzer.

Ya can't win them all! But the Seniors would love to win *ONE!*
