## Mr. Plache Hosts Married Students!

On one of the most beautiful Sunday afternoons in weeks, Mr. Plache hosted the married students! The day was sparked by ice cold beer and delicious hamburgers!

Jack Smock, with tears streaming from his eyes because of charcoal smoke, did most of the cooking! We had small-fry hamburgers for the kids and two pounders for the adults!

Located in the garage was table tennis and Bob Kuhn! He was taking on all comers and winning until the host showed up and beat him. Before the day was over they teamed up to take on all comers!

In the backyard and attached to one of the Deodar Trees was a dart game and just catty-corner on the far side a horseshoe game area! Tim Sakach more or less controlled the dart game while Terry Warren — and would you believe, myself — dominated the horseshoe game!

It was a tremendous success and something we all look forward to doing again!

## Faculty Over Imperial 81-53

Eight hardcore Faculty supporters showed up Saturday to spur their team on to victory over Imperial.

From the outset it was obvious that the Faculty had to contend not only with the Imperial team, but also with a

# Clarence Paul Meredith

## 1902-1968

Dr. Meredith was a rare example of one who served his Creator above all else. Although we were shocked to hear of his death this week, he lived a long, very interesting and extremely productive life.

Ambassador was the *seventh* college Dr. Meredith attended. He considered his Master of Arts Degree in Theology from us by far the most important of his degrees. From the first, Dr. Meredith had the desire to serve humanity. Because of a serious accident affecting the steadiness of one hand, he was detoured from his desire to become a physician and became a veterinarian instead. However, he definitely planned to retire early and go into scientific pursuits in the interest of serving his fellow-man.

With the outbreak of World War II, Dr. Meredith changed plans he had made for scientific service. He

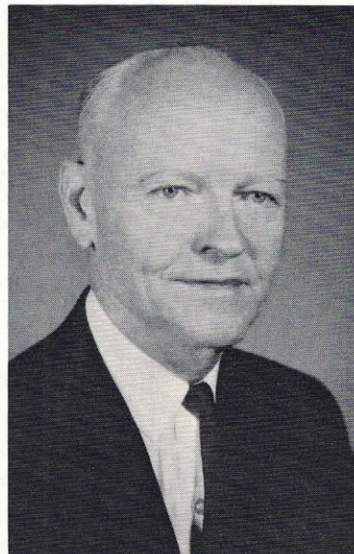

now saw clearly that — as General Douglas MacArthur stated — "It must be of the *spirit* if we are to save the

flesh." Therefore, he began a deep and comprehensive quest to find God's purpose in life and the true way to solve the world's problems. Dr. Meredith began hearing the **WORLD TOMORROW** broadcast in early 1942. He checked it carefully — along with *The PLAIN TRUTH* — and soon began to eliminate the other broadcasts and literature which he had been studying

from many different sources. He became a heavy contributor to God's Work and was one of three men whom God used as human instruments to "rescue" Ambassador College in the terrible financial crisis it suffered in 1948.

In August, 1949, Dr. Meredith resigned a prosperous veterinary

**Kindness**

Kindness has become a lost art. There is Be Kind to Animals Week or Be Kind to Flowers week — but what about Be Kind to People Week?

Kindness is...

... a warm smile.

... a sincere word of praise.

... a forethought into another person's problems instead of your own.

... knowing the difference between teasing and ridicule.

... having patience in the small things.

... looking into the inward depths of another being and overlooking the surface faults and frivolous actions.

... remembering who you owe and not who owes you.

... doing for those that don't and won't do for you.

... having compassion for someone else's trial.

... a quiet gentle act of unselfishness.

(Continued on page 3)

**Editorial**

**You Cost God's Work Over \$30,000!**

by George L. Johnson

Do you realize you're *being paid* to attend Ambassador?

"Being *paid* to attend Ambassador College?" you say. "Why that sounds silly! You can't tell me I'm being paid! Just look at my bill!" This might be your first reaction, but let's not jump to any conclusions. Let's look at the financial records.

The total expenditure per student is estimated to be *ten thousand dollars* per year. Figure it out sometime. Throw in the expense for buildings, salaries, materials and all the other cost factors.

To offset this, we are charged for room and board, and we pay thirty dollars per semester hour for our classes. But that *only* comes to approximately *two thousand dollars a year*. And that's a *far cry* from ten thousand dollars — in fact it's only one fifth of what it actually costs to put us through college!

When we subtract the two thousand dollars from the ten thousand we come up with an eight thousand dollar deficit! This eight thousand dollars is *actually* what Ambassador College is *paying you* each year to be a student! When that eight thousand dollars is divided equally by the number of school days, we find that we are being paid thirty dollars a day just to attend classes!

By the time a student has graduated that eight thousand dollars will have grown to *thirty-two thousand dollars*.

*Think of it!*

THIRTY-TWO THOUSAND DOLLARS! That's more money than most of us have seen in our life, yet this is the investment Ambassador College — God's Work — is making in each and every one of us!

In one sense Ambassador College is like a multi-millionaire investor. A man who is trying to use his money wisely. A man who is willing to invest in a product that he knows will bring returns. Not a man who is going to make a gamble on some "get rich scheme."

Every Ambassador student has been carefully screened to be sure that he or she is not a bad investment. To be sure that after thirty-two thousand dollars has been invested, there will be some returns that will benefit God's Work in some way!

But from time to time one of these investments will not "pan out." Perhaps they looked like a good investment, but turned out to be a gamble. A gamble that may have cost God's Work from eight to thirty-two thousand dollars!

Usually the number of investments that don't make good are *small*. And *hopefully they will stay small* if we will take it upon *ourselves* to be an investment — a *good sound* INCOME PRODUCING INVESTMENT — and NOT a GAMBLE!

You are attending one of the most beautiful college campuses in the world. Everywhere you look you will see beauty and quality.

No stone has been left unturned to give Ambassador College a cultural atmosphere conducive to study. The beautiful new Academic Center, the exquisite Student Center, and the magnificent Physical Education Facility are all part of this exuberant atmosphere.

But even more of a blessing than the beautiful surroundings is the fact that we have God's Truth. Here we have the fantastic opportunity to learn how to live, as well as how to make a living.

All of these things put together make us the most blessed college students in the world. Let's use that blessing — and the investment — and make good on what we've been given.

## Dunlap's Dynamic Super Sealer

by George Ritter

Animated envelopes are now being sealed at heretofore unheard-of speeds in the Ambassador College Mail Department. Gone are the days of the waterwheel, sponge, and sticky tongue.

The Mail Department has the ultimate in sophisticated sealers. There is none as fast on the commercial market!

The Dunlap sealer bears the name of its inventor and builder, Cliff Dunlap. You could call it the Cadillac of envelope sealers. This sealer was preceded by the Dunlap daddy sealer which has recently been retired because of old age.

Why write about a simple little envelope sealer?

Primarily because the Mail Department sends out approximately 150,000 letter-size envelopes each month. Obviously each one of these has to be sealed. Imagine how long it would take one man sealing the envelopes with a waterwheel. How about a tongue?

With the Dunlap Sealer hours of work are reduced to *minutes*. Also, long hours previously spent sealing Co-Worker Letters have been considerably reduced. Receipts and New Subscriber letters are some of the other items that find their way to this speedy sealer.

How speedy, you might ask?

Would you believe 35,000 letters an hour at full throttle? That's almost 600 a minute or *10 a second!*

Before this sealer was available, the top speed of existing models was only around 10,000 envelopes per hour. So right away we have *tripled* possible production. You can see the growing demand for a sealer of this type as our mailing list starts to skyrocket. With it, God's Work and the Mail Department will be better able to get the work done.

## Junior Dance Sneak Preview

by Jerry Weston

This year the Junior class promises to provide another pace-setting program of entertainment to spark the Junior Ball. In order to give you the inside story of what is coming this March 14, *The PORTFOLIO* sent me to find out how preparations for the dance are coming.

These past two weeks, committees have been busily working on a well-developed, fast-moving program. Enthusiasm over its progress and development is at a high pitch.

James Napier has been diligently working with his team of highly qualified (*PORTFOLIO*-trained) script writers and idea men to come up with exciting and *original* new skits.

"This year," Jim told me, "we are trying to present the Ambassador College scene in a simple down-to-earth manner. No grandiose production; no report-card-crushing extravaganza; just the Ambassador scene — the way the Junior class sees it. No doubt, the true-to-life realism will bring both laughter and tears to those watching."

A new (to Ambassador College) entertainment technique is going to be

employed to facilitate the fast-moving, hard-hitting production. Duane Hopper is now beginning to move into action to direct and mold the cast to this unique form of staging.

Like the rest of the program staff, Duane told me, "This year's Junior Ball is going to provide the most scintillating, stirring, and moving entertainment ever to hit an Ambassador College campus!"

Bob Davis is in charge of the committee on food. Because of a very low cost of props and costumes, more money is being diverted to appetizers and hors d'oeuvres. Along with the normal well-known tongue-teasers, Bob promises several new taste-tantalizing delicacies for you adventurous Ambassadors.

Other committees are currently doing their part planning and preparing for the special event. Almost every Junior has his job to do, and so far is doing it well.

Under the direction of class president Bill Whikehart, the class of '69 is putting out the best *TEAM* effort of its three years to provide Ambassador's best dance ever!

## Circular File

(Continued from page 2)

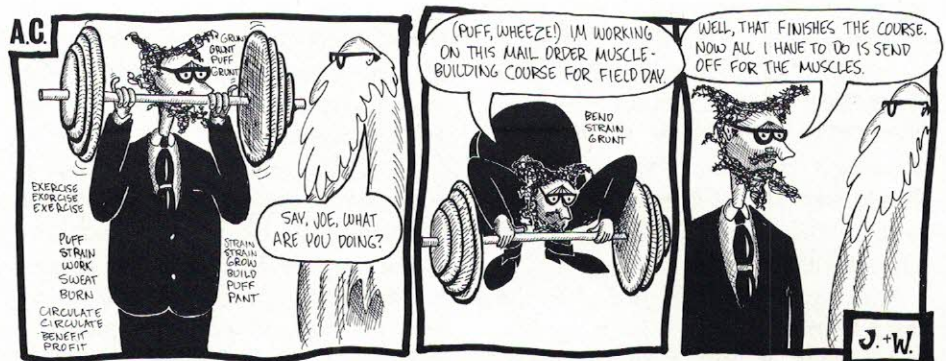

Why is it so much easier to say, "You make me so mad," or "I couldn't care less," than to say "I love you," (those three words do not always have to be uttered romantically) or simply "Can I help?"

## Mr. Eddie (Barber) Koo—Former Yo-Yo Promoter For Duncan

by Harry Eisenburg

Remember those Duncan Yo-Yos you had as a kid? Did you know that millions of American youngsters owe the fun they get out of these Yo-Yos to none other than our own *Ambassador College barber*, Mr. Eddie Koo?

The Yo-Yo is a Filipino toy with which Mr. Koo was quite familiar when he came to the United States from the Philippines in 1929. He spent the depression years cutting hair in the Chicago area, having learned barbering at the age of eight.

With the coming of World War II, Mr. Koo joined the army, and was sent to the Philippine theater of war. However, when General MacArthur's forces abandoned the islands to the Japanese in 1942, Mr. Koo did not go with them. Instead, he was left behind to raise up and train Filipino resistance groups. By the end of the war, Mr. Koo was something of a hero. Meanwhile he had attained the rank of captain.

Following the war, Mr. Koo returned to the Midwest, and it was in Michigan that he met and married Mrs. Koo.

It was also at this time, that Mr. Koo showed the Yo-Yo to Mr. Duncan, a former teacher of his, who felt he would like to market the toy. However, he retained Mr. Koo to be in charge of promotions and advertising.

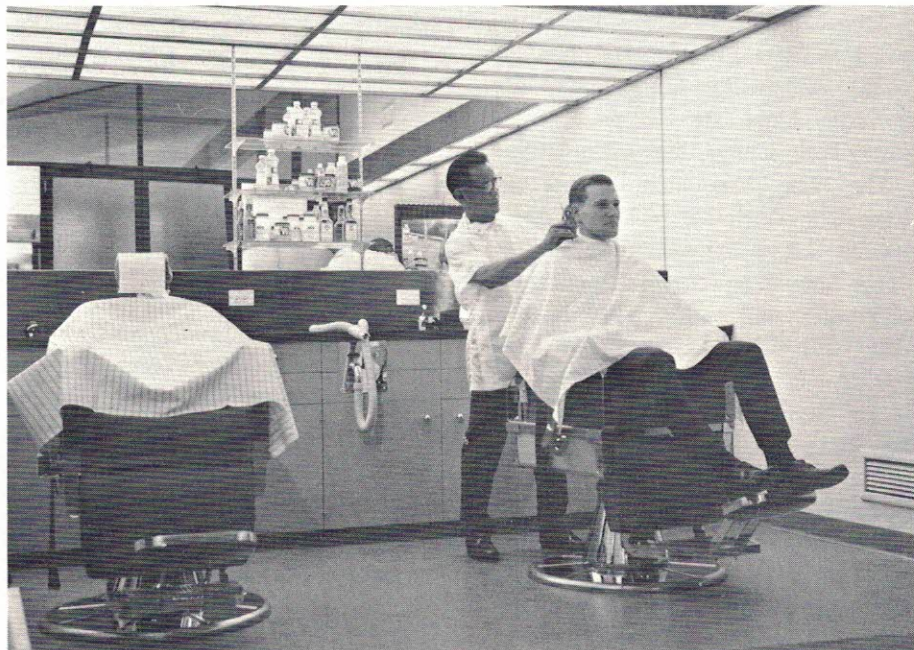

Yo-Yo, incidentally, is the Filipino name for the toy and it is a Duncan trademark. That is why the Duncan people say, "If it isn't a Duncan, it isn't a Yo-Yo."

Having achieved material success, Mr. Koo came to realize he was lacking another kind—spiritual success. In 1951, the Koos came out to California. It was in California where Mr. Koo heard *The World Tomorrow* program. God immediately led him to understand the truth and where His church was. A short while later, he came to Ambassador College to be employed as a gardener.

Being quite adept at barbering, he began to give students haircuts for free in his home. A short time afterwards, word of this came to the ministers and

Mr. Koo became a full-time barber. Notwithstanding, he continues to serve the students in many ways helping with shopping, watch repairs and in various other ways.

So, next time you're up in the barber shop, or anywhere you see him, ask Mr. Koo about some of his interesting experiences. I'm sure he'll have some *hairy* stories for you.

Mike gets Koo cut.

## For Men Only

Men of Ambassador! This is to announce that the Library actually has a *book* about your consuming passion, the great interest in your life! (No, girls, this means nothing to you, so please stop reading at this point. Thank you.)

Now, men, you'll have to be quick! Hurry! Run! Dash *immediately* over to the Library and be the first guy on your block to check out *The Treasury of the Automobile*.

No kidding, this is one book that is really worth reading. It begins at the beginning—a French army engineer by the name of Nicolas Joseph Cugnot was apparently the first man to sit behind the controls of a self-propelled road vehicle. (That was in the 1760's, if you're interested in that sort of thing).

### ATTENTION AMBASSADORS

Here is your opportunity to see a color travelogue on beautiful Switzerland.

Where: The Pasadena Civic Auditorium.

When: Thursday, March 7, at 8:20 p.m.

Cost: Prices range from \$0.75 to \$1.75.

This book gives all that is worth knowing about such cars as the Bentley, the Stutz Bearcat, the Ford, the Rolls Royce, the Peerless, the Jaguar, the Mercedes-Benz, the Maserati, the Ferrari and the Fiat.

And the pictures!

Wow!

Even if you aren't interested in reading the text, the pictures are an education in themselves. Pictures of such cars as the Bentley, the Stutz Bearcat, etc. Full-page spreads, in color, no less. Yes, men, *The Treasury of the Automobile* has all you'd ever want to know about cars.

A study indicates that men and women are about equal in hearing ability. The girls are ahead, though, in not listening.

## Dr. Meredith

(Continued from page 1)

practice and moved here to Pasadena, California. He came out, he said, "To help out in any way in God's Work." He often stated he would be glad to "shovel coal in the basement" if this would help build this Work. Completing all the undergraduate Bible and related courses, Dr. Meredith went on to receive a Master of Arts Degree in Theology from Ambassador College.

Because of Mr. Armstrong's growing concern for the need of a well-planned, comprehensive Bible Correspondence Course to aid our *thousands* of scattered members and co-workers — *at that time we had very few churches anywhere* — Dr. Meredith volunteered his services to this vast undertaking. Working with Mr. Armstrong and others, he began outlining, planning and finally writing and producing the Ambassador College Bible Correspondence Course in 1954. The enrollment of this course grew steadily and became one of the most vital arms of God's Work to strengthen our members and prospective brethren in the detailed knowledge of God's Word.

The enrollment of the course grew fantastically — and now includes some 82,000 students, worldwide. Dr. Meredith also wrote many basic and helpful articles for *The PLAIN TRUTH Magazine*. But Mr. Armstrong told him years ago that his service in founding and writing the Correspondence Course alone enabled him to accomplish more in his lifetime than most men who have ever breathed.

Dr. Meredith will always be remembered by those who knew him well for the twinkle in his eye, the wry humor and the constant interest in real truth — the knowledge of God, world conditions and the "basic answers" to all phases of life which he constantly sought. He did live an interesting life, and God permitted him to enjoy greatly his chief recreational and educational pastime, world travel. For Dr. Meredith enjoyed fantastic trips through Europe, the Middle East and Far East, Africa, North and South America and even the Soviet Union.

But the most memorable of all Dr.

Dr. Meredith and Mr. Sedliacik.

Meredith's weighty contributions to the happiness and welfare of his fellowman will be his early and vigorous support of God's Work and Ambassador College in the difficult early years, and the fantastic service rendered to increasing thousands of human beings through the Ambassador College Bible Correspondence Course. For these accomplishments and many others, thousands of people he has never seen will look forward to meeting him, and *thanking him*, in the resurrection. (A more detailed article will appear in *The GOOD NEWS*.)

Dr. Meredith and Correspondence Course Staff.

## FACULTY

(Continued from page 1)

monstrous mass of high-pitched Imperial fans.

Mike Portune made the first basket of the evening. The stands went wild. A loud cacophony of discordant yehs and hurrahs reverberated against the giant T beams overhead. Not since the advent of Italian basketball has there been so much excitement over a ball going through the hoop.

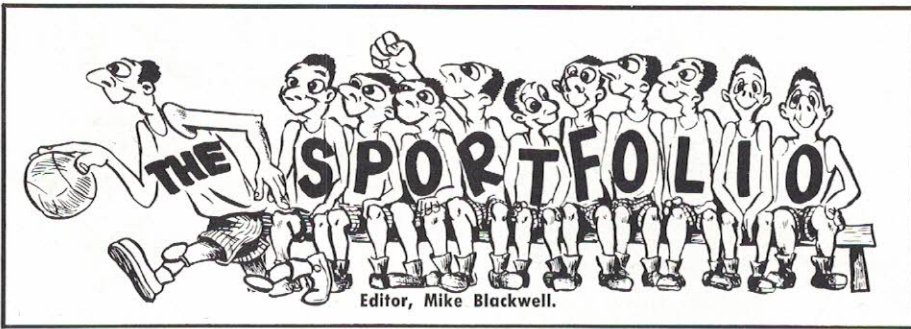

Despite this difficulty the Faculty weathered the unbalanced stand support to lead at the half, 34-19.

It was announced at half time that all Faculty supporters were to file out and receive free lemonade! Immediately the Faculty's backers grew in number. However, before the half was over they shrank back to normal.

The Faculty continued to pursue their lead in the second half. By now their rooters had congregated in one section of the stands, and had gathered up six megaphones to counteract the overwhelming numbers in the southern stand.

Soon, under the inspiration of their well-organized support, the Faculty jumped their lead to 62-36. Imperial rallied with the help of Dave Wells' 17 points, but the Faculty came out ahead 81-53. (See p. 8 for stats and pictures.)

## Ambassadors "Lakerettes"

by Dannie Rogers

Have you ever noticed how much Toni Hammer resembles Jerry West? If you haven't then you've probably never seen an Ambassador Girl's basketball game.

Every Sunday afternoon at 3:30 the girls exchange their hair brushes for knee braces and the battle of the baskets is on.

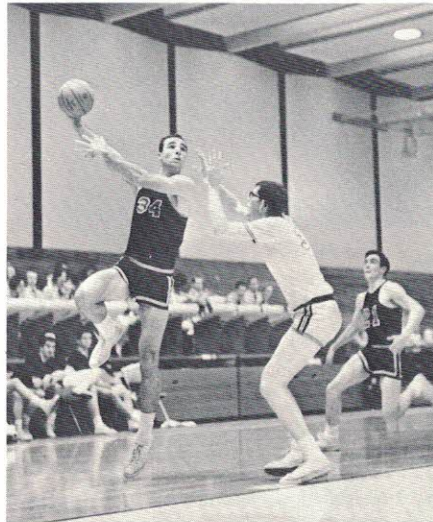

You've probably seen Marsha Whitley pushing a vacuum cleaner, but have you ever seen her pushing a ball through the basket for two points on a driving lay-up? Or maybe you've seen Miss Kaye Pyle conducting a women's club — but who would have thought she could rebound like Wilt the Stilt himself? But you ain't seen nothing until you've seen Becky Graham (one of the few 4' 11" forwards left in the game) swish one from 25 feet!

Last Sunday's game was a real cliff hanger. After five minutes of play the score remained tied at 0-0!

Coach Haworth called time out to lay plans for the crucial basket. Both teams reassembled on the court. Time was running out—the Green team controlled the ball. The crowd came to its feet as the shot went up.

It was good for two points — could this mean the game?!

Actually, the final score was 39-37 in favor of the White team. This made 2 in a row for the mighty Whites — but the gallant Greens have laid plans for revenge next Sunday afternoon. For drama, excitement, adventure (plus maybe a few laughs) make sure to be on hand for the next Ambassador Co-ed cage game.

"Don't do it, Larry"

"Able to leap..."

## Junior Teamwork Takes Seniors

Nineteen explosive assists gave the Juniors the impetus to roll out a 76-69 victory over the Seniors Wednesday night. *Teamwork* was the key factor from start to finish.

The Juniors, who normally start slow, quickly worked the ball in to their big men to grab the lead 14-2. Whitfield and Meyer methodically stashed the basket to build the score to 23-13.

The Seniors were having one of those nights. Haworth couldn't hook; Kobernat couldn't hit; Roberts couldn't get loose; and Carley picked up 3 quick fouls.

By half time the Juniors had worked their way to a sizeable 44-28 lead.

The never-say-die Seniors came back strong the second half. Haworth and Roberts picked up points while the Juniors picked up fouls. Meyer quickly had three; then four! Then Whitfield had four! It was time to give the big men a rest.

The score slowly but steadily narrowed: 52-40, 54-46, 58-52! Now Kobernat and Haworth brought it to within two — 58-56! This was too much for the Juniors. Now was no time to blow it.

"DRIBBLE it, PASS it, ..." shouted the desperate Junior cheering section in unison. Quickly their team went to work. A fast pass to Dave Orban and *swish* — the recovery was on. Another fast pass to Whikehart their total went up two more. Then Meyer and Whitfield came back to lay on the "coup de gras." Time swiftly ran out for the Seniors as the Juniors won their third game of the year, 76-69.

# Sophomores Take First Place Edge Faculty In Showdown

With 2 seconds left Mr. Petty went up for the shot. The eyes of Ambassador College focused on the brown leather sphere as it arched its way toward the basket. Would this mean overtime or would the Sophomores have done it? The whole college watched and wondered.

The final shot was the crescendo of a suspense filled game. It started with the Sophs unable to hit—the Faculty defense looked impenetrable.

Mr. Petty broke the scoring ice with a great move followed by an easy lay-up. Mr. Alexander quickly followed suit with 2 more.

The Sophomores were down 4-0 but big Ben Wesley cut the margin in half with a high archer from 20 ft. and the sophs began to roll.

Dan Orban began to hit from outside for the first time. Ben Wesley added his from underneath and 20 ft. The dynamic duo pulled the Sophs to a 7 point lead over the hustling Faculty 43-36.

Even as the teams left the court at half time — everyone awaited the second half Faculty blitzkrieg. Sure enough—the experienced Faculty returned to slash apart the Sophomore lead.

With 8 minutes left in the game—the score was tied 62 all.

The Faculty strategy had pulled

Royer Intercepts Downtourt Pass.

all the Sophomore big men out from underneath—all except one—Scott Royer and his 23 points.

Eric Williams and Mr. Petty kept the Faculty going. Ray Pyle became a fly swatter on defense for the Sophomores as Tom Ray kept hitting the crucial shots offensively.

Within the final minute—the entire game was decided.

The Sophomores would score to lead by three—then the Faculty would cut it to 1.

With 25 seconds left the Faculty had the ball and a good chance to win. The shot missed and Ben Wesley was there waiting with open arms.

11 seconds—a foul! Ben Wesley,

one of A. C.'s best free throw shooters went to the line shooting one and one. It would mean the game for the Sophs if both were made.

The first was up—and in. The second—off to the right—Faculty ball! A glimmer of hope for the Faculty cause.

Mr. Petty dribbled to the corner. Two points down with 2 seconds remaining, he shot—there was silence for a moment then Dan Orban smiled as the shot bounced *out*—the crowd became a mass of laughter and cheers for both teams.

The summit-bound Sophomores had beaten the Faculty 77-75 to take the league lead!

Action Under the Boards.

## Freshmen Beat Sophomores 78-75

The mighty Freshmen playing their best game of the year toppled the undefeated Sophomores 78-75 Saturday night. It was one of the best games of the season as both teams hit around the 50 percent mark.

Jack Sowder seemed to be the big Sophomore nemesis. He kept the hustling Freshmen ahead throughout the game and ended the first half with an outstanding 20 points!

The Sophs had no problem hitting the open man but the open man had trouble hanging on to the ball. Bernie Schnippert completely dominated the boards and the Sophs only got one chance to make a shot.

The Freshmen adding to their barrage had one of the hottest nights shot-wise of any team yet. They led by four at the half 40-36 by making about every other shot taken. Could they hang on in the second half?

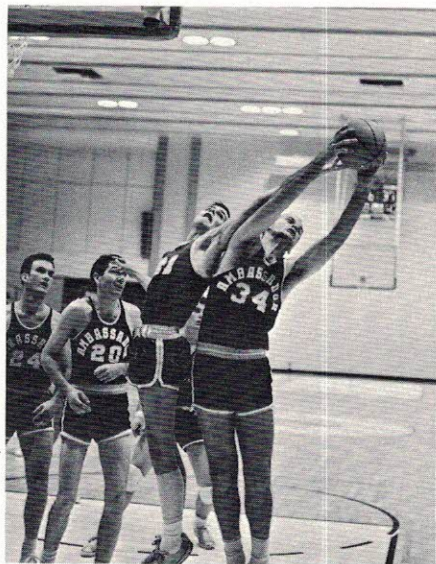

For the Sophomores the story of the second half was much the same as that of the first—they couldn't find the handle on the ball. Two minutes had elapsed before Wesley put the Sophs on the scoreboard with a free throw! By this time Sowder and Fischer had added 8 for the Frosh.

Wesley came back with 7 straight points to keep the Sophomores in the game—but the Freshmen stayed red-hot. Nothing could stop them. One Freshman shot after another ripped the cords.

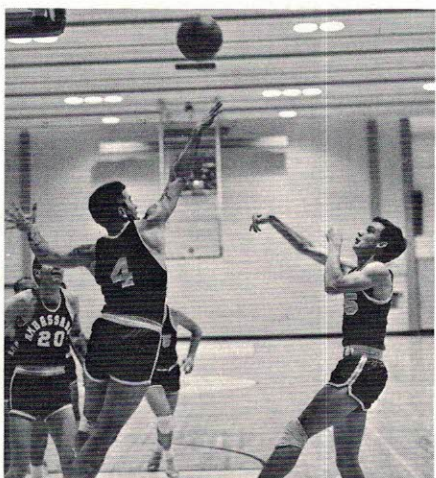

Early in the half Royer picked up his fourth personal and was quickly followed by Pyle and Wesley. The press became more of a burden than a help. Sophomore defense was hurting as the Freshmen attempted one on one drives against Pyle and Wesley. Fast action and tremendous shooting filled the game as the contest raged on.

The Sophomores were playing a real good game—but the Freshmen were playing a better one! The Sophs blew two chances to put the game on ice and allowed the Freshmen to capture the ball. With the game tied Gil Norman called for the weave and got the Sophs playing the Freshmen game.

Wesley put the Sophs ahead by one.

Stephens and Mr. Alexander struggle for rebound.

Wells for 2.

Wesley gets the rebound.

Norman followed with 2 for the Frosh giving them the lead 76-75. Orban took a jumper and missed. Sowder had the rebound for the Freshmen with 37 seconds left to play and a lead of one point. The Freshmen went into a stall. Orban was called for an intentional foul and Meyer went to the line shooting two. Both attempts were missed—but the Sophs blew another chance and collected another foul.

Norman went to the line shooting two with two seconds remaining and proceeded to put the icing on the cake for the Freshmen 78-75.
