Always check the context of these numbers in the main subject catalog! They may not always be what they sound like. The subject index is intended only as a guide for where to find listings in the main catalog, not as a direct classification tool.

Numbers marked with an asterisk above identify categories used in the optional expansions found in the Appendices to the classification system. Most users can use just the top level category for such materials.*

This is the 2d release of the Subject Index. It accompanies the 4th edition of the classification system. Released January 4, 2006.
